

# The Quantum Care

By Dr. Stacy Musselman, DNM, Ph.D.

**P**alm Beach welcomes Dr. Stacy Musselman, with her two new Boca Raton locations. Dr. Musselman's specialty is prevention and early detection of what could become chronic medical issues.

Conventional medicine treats symptoms with synthetic prescriptions. Dr. Musselman identifies patterns trending toward dysfunction

with the intent of catching things before they become pathological. The Quantum Care program is holistic and looks at not just basic blood panels or only CBC hematology but evaluates a comprehensive panel of 90 biomarkers, with this information she can see things other practitioners are unable to identify. "The bloodwork shows me everything, identifying potential issues when they are sub-clinical and making subtle sustainable changes is the Quantum Care way." Dr. Musselman says.

What sets Dr. Musselman's Quantum Care program apart from the rest?

First, she assesses all aspects of the individual as a whole, including eating habits, lifestyle choices and evaluates every person as a unique individual. Dr. Musselman believes everyone gets into a state of disease differently, knowing how someone got there is half the battle. Education and accountability are paramount in her program. Dr. Musselman gives practical and actionable guidance so people can feel great, take care of their bodies and enjoy the process. Some people are a complicated puzzle; others may just need a minor tweak. Each person is a unique individual and so are the customized protocols they receive. Quantum Care supplementation recommendations are all non-synthetic and excipient (filler) free and only use DNA sequenced live sourced raw materials. Excipient-free and clean supplementation are a priority to the program. Dr. Musselman has seen the incredible results of supplementation in the bloodwork of her patients. Feeling and being

your optimal best can be as simple as adding one or two essential supplements that a person is deficient in or missing.

Here is what several of her patients have to say. "Thanks to the Quantum Care program, I lost 35 pounds! Dr. Musselman's recommendations were easy, and I have never felt better!" NF. "I have been with the Quantum Care program for a few years now and every year I see an improvement in my optimal biomarkers. "My libido is back, and I am sleeping soundly throughout the entire night. I have been seeing an endocrinologist for years and with the addition of Dr. Musselman's recommendations I finally feel amazing at 57! She has done more for me than any other doctors have done. My protocol was easy and she made it effortless by coming to my home." LB. "I have been on the Quantum Care program for over 4 years now and every year I have seen an improvement in my bloodwork. This year I increased my optimal biomarkers by 12! At 45 I am in the best shape of my life, inside and out and keep improving as I age." SM

Dr. Musselman's reviews speak for themselves. The Quantum Care program will help you achieve all your health goals!

It all starts with a quick blood draw in a laboratory of your choosing or if you prefer in the safety and privacy of your own home. Dr. Musselman understands that privacy and safety are paramount especially in this new COVID-19 environment. In person or virtual appointments can be booked online at [yourquantumcare.com](http://yourquantumcare.com). Once your bloodwork is received and analyzed, supplementation recommendations are drop shipped directly to your door. Dr. Musselman is available by phone or video chat and also offers concierge service at your home or work if you prefer a more private, convenient and comfortable setting.

"Helping people look and feel their best is wonderful, but seeing the results in the bloodwork is priceless. Bloodwork is the library of the body and the greatest joy for me is helping people feel their best, achieve their health goals, and seeing the results in the bloodwork." Dr. Musselman says.

## QUANTUM CARE

The **QUANTUM CARE** program will help you achieve your health goals!

Customized protocols are individually based on your Functional Blood Chemistry Report (FBCA). A quick blood draw in the privacy of your home or at a local lab is all it takes to get started. Dr. Musselman will assess a comprehensive panel of 90 biomarkers and create a customized plan for you. Dr. Musselman is a Board Certified Holistic Health Practitioner who practices Natural Medicine, specializing in preventative care and overall wellness.
